Wayne

Could you send me Phils slide presentation? It wasn't attached

Thank you. I did not see a USAF slide which showed the sentinel well line/ring to prove no additional fuel migration or to provide an alert to contamination migration. ADEQ appreciates the USAF attempting to characterize the fuel "thumbs". Given the fact that there are, and have been, fuel "projections" discovered but not characterized, it is an opinion that data gaps existed in the past and still occur. These data gaps now could be even more important to close since the SEE heated and mobilized the fuel and there is no sentinel well ring.

Dear Ms. Herrera and Ms. LePage,

I request the opportunity to present the attached slides at today's teleconference. I'll take no longer than 15 minutes to do so.

Thanks,

<<...>>
